

PUBLIC TRANSPARENCY REPORT

2024

Helaba Invest Kapitalanlagegesellschaft mbH

Generated 25-11-2024

About this report

PRI reporting is the largest global reporting project on responsible investment. It was developed with investors, for investors.

PRI signatories are required to report publicly on their responsible investment activities each year. In turn, they receive a number of outputs, including a public and private Transparency Report.

The public Transparency Reports, which are produced using signatories' reported information, provide accountability and support signatories to have internal discussions about their practices and to discuss these with their clients, beneficiaries, and other stakeholders.

This public Transparency Report is an export of the signatory's responses to the PRI Reporting Framework during the 2024 reporting period. It includes the signatory's responses to core indicators, as well as responses to plus indicators that the signatory has agreed to make public.

In response to signatory feedback, the PRI has not summarised signatories' responses – the information in this document is presented exactly as it was reported.

For each of the indicators in this document, all options selected by the signatory are presented, including links and qualitative responses. In some indicators, all applicable options are included for additional context.

Disclaimers

Legal Context

PRI recognises that the laws and regulations to which signatories are subject differ by jurisdiction. We do not seek or require any signatory to take an action that is not in compliance with applicable laws. All signatory responses should therefore be understood to be subject to and informed by the legal and regulatory context in which the signatory operates.

Responsible investment definitions

Within the PRI Reporting Framework Glossary, we provide definitions for key terms to guide reporting on responsible investment practices in the Reporting Framework. These definitions may differ from those used or proposed by other authorities and regulatory bodies due to evolving industry perspectives and changing legislative landscapes. Users of this report should be aware of these variations, as they may impact interpretations of the information provided.

Data accuracy

This document presents information reported directly by signatories in the 2024 reporting cycle. This information has not been audited by the PRI or any other party acting on its behalf. While this information is believed to be reliable, no representations or warranties are made as to the accuracy of the information presented. The PRI has taken reasonable action to ensure that data submitted by signatories in the reporting tool is reflected in their official PRI reports accurately. However, it is possible that small data inaccuracies and/or gaps remain, and the PRI shall not be responsible or liable for such inaccuracies and gaps.

Section 1. Our commitment

- Why does your organisation engage in responsible investment?
- What is your organisation's overall approach to responsible investment, and what major responsible investment commitment(s) have you made?

The planet we live on is increasingly characterised by scarce resources, climate change and social challenges. Since our founding, sustainable action has been a matter of course for us as a subsidiary of Helaba, a German Landesbank. The sustainable orientation of our business activities is a decisive corporate obligation of Helaba Invest and an essential component of our social responsibility. Based on this corporate philosophy, we integrate social and ecological issues into our activities in addition to business aspects. Our sustainability management is based on various national and international sustainability standards, such as the German Sustainability Code (DNK) and the Global Reporting Initiative (GRI).

In order to cope with climate change and to overcome global challenges, states, societies and companies are equally called upon to respond. This is a responsibility that we are determined to face up to. We are aware that, as a large institutional investor, we can make the greatest contribution to a sustainable development with a product portfolio that is focused on sustainability. We consider sustainability as a process of continuous development and take a holistic approach, incorporating ecological, social and economic dimensions in the sense of the Sustainable Development Goals of the UN. In 2019, we developed a sustainability strategy that is embedded in our business and risk strategy. We are convinced that, in the end, everyone benefits from a business model focused on sustainability: Our institutional clients, our employees and, society as a whole.

It therefore goes without saying that we have positioned ourselves sustainability-oriented, both in terms of our business and as an employer. In our voluntary sustainability report for 2022, we have presented our main objectives in a transparent way as well as the goals we have already achieved. In this context, we have identified three fields of action in a materiality analysis conducted in the beginning of 2022, which form the pillars of our sustainability strategy: Good Corporate Governance, Sustainable Products and Services, and Attractiveness as an Employer. In these fields of action, essential topics were identified and management approaches with strategic goals as well as indicators for measuring the achievement of these goals were developed. In this connection, we recognize the Paris climate agreement and its paramount importance.

Section 2. Annual overview

- Discuss your organisation's progress during the reporting year on the responsible investment issue you consider most relevant or material to your organisation or its assets.
- Reflect on your performance with respect to your organisation's responsible investment objectives and targets during the reporting year. Details might include, for example, outlining your single most important achievement or describing your general progress on topics such as the following (where applicable):
 - refinement of ESG analysis and incorporation
 - stewardship activities with investees and/or with policymakers
 - collaborative engagements
 - attainment of responsible investment certifications and/or awards

As a full-service manager, Helaba Invest supports its institutional customers across the entire value chain of professional asset management. We manage mandates with a sustainability focus and offer individual solutions for investors. The sustainable orientation of our business activities is a crucial corporate obligation and an essential component of our social responsibility.

Helaba Invest's mission is to promote sustainable social prosperity through capital investment. By signing the Principles for Responsible Investment (PRI) and the Carbon Disclosure Project (CDP), we are making a clear commitment to sustainability. As a participant in the "Responsible Investment", "Sustainability in Real Estate Funds" and "Impact Investment" working groups of the German industry association BVI, we promote regular exchange in the fund industry and actively drive the further development of industry-wide standards.

We have established a sustainability strategy that is embedded in our business and risk strategy. Between 2020 and 2023, we published our sustainability report in accordance with the recognised DNK format (German Sustainability Code) on a voluntary basis.

With regard to our product portfolio, we achieved progress in 2023 in the following areas:

We advanced in the compliance with regulatory requirements regarding the Sustainable Finance Disclosure Regulation (SFDR). Fulfilling its Regulatory Technical Standards, we contributed through the publication of SFDR annexes to more transparency in our funds which disclose in accordance with Article 8 SFDR. In the reporting year, two Alternative Investment Funds changed from Article 6 to the Article 8 disclosure requirements. Further fund changes are also planned in this regard. In addition to that, we ensured compliance with product requirements which are adequate for clients with sustainability preferences in accordance with MiFID II.

Furthermore, we published for the first time being the Principle Adverse Sustainable Impact Statement of Helaba Invest. In this publicly and voluntarily disclosed document, we aggregated 20 Principal Adverse Impact (PAI) indicators from fund level to entity level in accordance with Article 4 SFDR. Although a broad variety of PAI-calculation methods exists, policy makers, regulators, and our clients have now the opportunity to compare the sustainability performance of EU asset management companies from an impact-related point of view.

Apart from regulatory requirements stemming from the EU Green Deal, we contributed to the preparation to our parent company's Sustainable Investment Framework. The Framework was finalized on 12 December 2023 and will enter into force in April 2024. The Framework will be used to assess Helaba Group's investments from a sustainability perspective and to measure the proportion of sustainable investments relative to the total volume of investments. All other things being equal, it aims to achieve a measurable increase in sustainable investments by utilizing ESG-criteria such as turnover-based thresholds for certain economic activities like coal mining and coal-based power generation.

Regarding our operational activities, our parent company, Helaba, purchased CO2 certificates from "atmosfair", a provider that uses the proceeds to support effective climate change mitigation projects, in the amount of our calculated CO2 emissions (generated at our site and through business travel).

Helaba Invest is also continually expanding its social commitment: For example, employees took part in the Malteser Social Day for the fourth time in the year under review and collected for the first-time rubbish in a public park of Frankfurt am Main. Lastly, as a signatory of the German Diversity Charter (Charta der Vielfalt), our managerial staff participated in a diversity workshop to promote the concept and advantages of a corporate culture that is without prejudice or discrimination.

Section 3. Next steps

- What specific steps has your organisation outlined to advance your commitment to responsible investment in the next two years?

In the coming two years, the primary focus will be on the further development of the group-wide Sustainable Investment Framework. In 2024, it is intended to implement the Framework which was internally completed in December 2023. Key objectives will include integrating regulatory developments and evaluating an appropriate level of ambition. Furthermore, significant milestones will encompass the calculation and publication of financed emissions, along with the development of a potential decarbonization strategy in this context.

Section 4. Endorsement

'The Senior Leadership Statement has been prepared and/or reviewed by the undersigned and reflects our organisation-wide commitment and approach to responsible investment'.

Name

Dr. Hans-Ulrich Templin

Position

CEO and responsible for sustainability

Organisation's Name

Helaba Invest Kapitalanlagegesellschaft mbH

● A

'This endorsement applies only to the Senior Leadership Statement and should not be considered an endorsement of the information reported by the above-mentioned organisation in the various modules of the Reporting Framework. The Senior Leadership Statement serves as a general overview of the above-mentioned organisation's responsible investment approach. The Senior Leadership Statement does not constitute advice and should not be relied upon as such. Further, it is not a substitute for the skill, judgement and experience of any third parties, their management, employees, advisors and/or clients when making investment and other business decisions'.

Indicator	Type of indicator	Dependent on	Gateway to	Disclosure	Subsection	PRI Principle
PGS 4	PLUS	PGS 1	N/A	PUBLIC	Responsible investment policy elements	1 – 6

Does your formal responsible investment policy(ies) identify a link between your responsible investment activities and your fiduciary duties or equivalent obligations?

(A) Yes

Elaborate:

Our formal responsible investment policies identify a link between our responsible investment activities and our fiduciary duties in the following manner: The scope of the ESG Investment Policy is publicly disclosed and we explain our motivation and philosophy behind responsible investment activities. We have established an ESG committee where sustainability issues are discussed between all relevant organizational units of Helaba Invest. In our two business areas AM Illiquide and Liquide, two ESG committees analyze ESG-specific issues of companies, sectors, countries, or regarding product development. We analyze sustainability risks as part of our risk management approach in order to fulfil our fiduciary duty as an asset manager. We do not exclude investments in green bonds of those companies which are excluded by our ESG Investment Policy. This helps portfolio companies to transition to more sustainable business practices. However, we do not invest in green bonds of companies which violate our ethical requirements. Moreover, we ensure the compliance of our activities with our responsible investment activities by monitoring exclusion criteria with pre-trade and post-trade investment compliance checking. We have implemented an ESG reporting line via our eReporting to our institutional clients. The responsible investment activities we apply are part of the pre-contractual documents.

GOVERNANCE

ROLES AND RESPONSIBILITIES

Indicator	Type of indicator	Dependent on	Gateway to	Disclosure	Subsection	PRI Principle
PGS 11	CORE	N/A	Multiple indicators	PUBLIC	Roles and responsibilities	1

Which senior level body(ies) or role(s) in your organisation have formal oversight over and accountability for responsible investment?

- (A) Board members, trustees, or equivalent
- (B) Senior executive-level staff, or equivalent**

Specify:

In integrating sustainability practices at Helaba Invest, strong corporate governance plays a vital role. The final accountability for sustainability rests with the management board, led by the CEO. This entails overseeing the establishment of appropriate structures within the organizational framework. Consequently, sustainability is embedded across all departments which aims to ensure that dedicated resources are allocated accordingly.

- (C) Investment committee, or equivalent**

Specify:

Helaba Invest has established in its investment processes two ESG committees to propose sustainability-related aspects operationally. Both monitor developments at the regulatory and legislative levels, assess their potential impact on the ESG Investment Policy and provide recommendations to investment committee. In the AM Liquide business area, ESG-related events for companies, sectors, and countries are analysed. In the AM Illiquide business area, analysis is conducted at target fund level.

- (D) Head of department, or equivalent**

Specify department:

The sustainability officer has the opportunity to report directly to the CEO. Each department or team leader is responsible for their respective areas with sustainability-related topics. Compliance (second line of defense) and internal audit (third line of defense) are responsible for monitoring and reviewing the aforementioned structures according to their respective mandates.

- (E) None of the above bodies and roles have oversight over and accountability for responsible investment

Does your organisation have governance processes or structures to ensure that your overall political engagement is aligned with your commitment to the principles of PRI, including any political engagement conducted by third parties on your behalf?

- (A) Yes
- (B) No

Explain why:

Currently, our organisation has no particular governance processes or structures regarding our overall political engagement. We conduct our political engagement exclusively through third parties, mainly associations. Among these are firstly, the Bundesverband Investment und Asset Management (BVI) since 1991, a significant German fund association representing the interests of the German fund industry to policymakers, regulatory authorities, and international institutions. As part of this commitment, the member companies of BVI have decided to adopt guidelines for responsible investing, embracing social, environmental, ethical, and corporate governance responsibilities. These guidelines orient themselves towards the principles of responsible investing set forth by the United Nations (UN PRI).

Secondly, the Bundesverband Alternative Investments e.V. (BAI) since 2012, an asset class- and product-spanning representation of interest for Alternative Investments in Germany. Thirdly, the Bundesverband Öffentlicher Banken Deutschlands e.V. (VÖB) since 2022, the association of German public banks. Lastly, we are also represented on the admission committee of the German Association for Financial Analysis and Asset Management e. V. (DVFA) which is a society of investment professionals in Germany which engages in regulatory and political discussions via its committees. As part of the Helaba Group, our political interest may be considered directly or indirectly through the political lobbying activities and association memberships of our parent company, Helaba, which discloses its activities in its sustainability report available under: <https://www.helaba.com/media/docs/int/sustainability/sustainability-report-2023.pdf> (see page 52).

- (C) Not applicable, our organisation does not conduct any form of political engagement directly or through any third parties

Indicator	Type of indicator	Dependent on	Gateway to	Disclosure	Subsection	PRI Principle
PGS 23	PLUS	OO 5, OO 8, OO 9	N/A	PUBLIC	Stewardship: Overall stewardship strategy	2

How does your organisation, or the external service providers or external managers acting on your behalf, prioritise the investees or other entities on which to focus its stewardship efforts?

As an institutional investor, we embrace our responsibility and consider active ownership to be a fundamental pillar of our investment strategy. Engaging in constructive dialogues with companies (engagement) and exercising our voting rights at shareholders' meetings (proxy voting) are integral to our approach for liquid asset. Furthermore, in pursuit of our commitment to corporate engagement, we have teamed up with ISS Europe Ltd., an esteemed external partner.

When prioritizing investees or other entities within the engagement process, we follow both a proactive and a reactive approach.

Proactive approach:

In order to direct our engagement activities, we have established an ESG panels. This panel convenes on a monthly basis and functions as a platform to address present-day matters stemming from ongoing engagement activities. Furthermore, the panel determines the companies that will be the focus of future engagement activities. The selection process is grounded in an analysis of substantial environmental, social, and governance (ESG) issues. Priority is accorded to companies that hold significant importance within the portfolio or investment universe.

Reactive approach:

Moreover, engagement activities can also be triggered by any of the following situations:

- Violation of the ESG Investment Policy of Helaba Invest or the Helaba Sustainable Investment Framework
- Violation of specific requirements of funds which incorporate ESG factors in their investment strategy
- Violation of national or international standards, e. g. UN Global Compact violations
- ESG controversies
- Negative media reporting

For proxy voting, we have entrusted ISS Europe Ltd. with the exercise of voting rights for publicly listed corporations and reporting on their voting behavior. In the process of prioritizing investees or other entities, ISS has developed proxy voting guidelines that align with the goals of sustainability-focused investors and fiduciaries.

For our illiquid assets, we uphold the same commitment as a responsible investor. We primarily utilize, if applicable, our voting rights as advisory board members. Voting favours ESG-promoting measures if it does not affect financial returns negatively.

Elaborate on your organisation's default position on collaborative stewardship, or the position of the external service providers or external investment managers acting on your behalf, including any other details on your overall approach to collaboration.

ISS ESG's Collaborative Engagement Services allow investors to participate in a joint outreach and dialogue with companies on material sustainability-related themes, facilitated by ISS ESG. Helaba Invest uses ISS ESG's Norm-Based Engagement solution (previously known as Pooled Engagement). Under the Norm-Based Engagement solution, ISS ESG intends to identify companies that fail to prevent or address social and environmental controversies in line with established standards for responsible business conduct, such as the UN Global Compact and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises. Through the engagement facilitated by ISS ESG, investors can voice their concerns with identified companies and request transparency regarding risk mitigation. Engagements cover the following areas:

- Environment
- Human Rights
- Labour Rights
- Corruption.

Rank the channels that are most important for your organisation in achieving its stewardship objectives.

- (A) Internal resources, e.g. stewardship team, investment team, ESG team, or staff
Select from the list:
 3
- (B) External investment managers, third-party operators and/or external property managers, if applicable
Select from the list:
 2

(C) External paid specialist stewardship services (e.g. engagement overlay services or, in private markets, sustainability consultants) excluding investment managers, real assets third-party operators, or external property managers

Select from the list:

1

(D) Informal or unstructured collaborations with investors or other entities

Select from the list:

4

(E) Formal collaborative engagements, e.g. PRI-coordinated collaborative engagements, Climate Action 100+, or similar

Select from the list:

5

(F) We do not use any of these channels

Indicator	Type of indicator	Dependent on	Gateway to	Disclosure	Subsection	PRI Principle
PGS 26	PLUS	OO 8, OO 9, PGS 1	N/A	PUBLIC	Stewardship: Overall stewardship strategy	2

How does your organisation ensure that its policy on stewardship is implemented by the external service providers to which you have delegated stewardship activities?

(A) Example(s) of measures taken when selecting external service providers:

The primary consideration in selecting an external service provider was the alignment with our own sustainability requirements. ISS ESG's Norm-Based Engagement service is focused on encouraging corporate disclosure of efforts taken to manage or mitigate environmental and social risks connected to business activities or operations. The Norm-Based Engagement service enables participating asset owners and managers to wield more influence than through solo engagements, while saving time and resources. In 2023, ISS ESG was mandated to represent clients under the Norm-Based Engagement service in engagements on environmental, social, and governance issues with 130 companies covering 193 individual ESG topics, across 28 different locations. Indigenous rights and the right to an adequate standard of living were the key topics under human rights. Union rights was the dominant labour rights theme, followed by workplace discrimination (gender and/or racial). The majority of environment-focused engagement topics were related to corporate management of incidents of pollution (air, water, and/or soil) and environmental impact. For companies facing controversies on their anti-corruption management systems, engagement focused on their efforts to address reported incidences of bribery and anti-competitive behaviour.

(B) Example(s) of measures taken when designing engagement mandates and/or consultancy agreements for external service providers:

In the process of designing engagement mandates, we adopt a collaborative approach with our service provider. Through quarterly assessments, we have the opportunity to report mandates that are considered significant for potential engagement processes based on the decision of the internal ESG-panel. Mandates are deemed particularly important in cases where no engagement has been conducted for an extended period of time, when an ESG controversy has been identified, where Helaba Invest acts as an asset owner or the internal engagement approach has not yielded the desired outcomes.

The engagement efforts of Helaba Invest, as well as its external partner ISS ESG, are focused on the following sustainability topics:

- Climate strategy
- Human and labor rights, including working conditions
- Good corporate governance and anti-corruption measures.

(C) Example(s) of measures taken when monitoring the stewardship activities of external service providers:

The activities of our external provider are monitored through various channels. The primary pillar of this monitoring process is the systematic and quarterly/annual reporting they provide to us. Moreover, we receive periodic updates on their ongoing and planned activities in the form of scheduled conference calls in which we also participate on a regular basis.

Indicator	Type of indicator	Dependent on	Gateway to	Disclosure	Subsection	PRI Principle
PGS 27	PLUS	OO 8, OO 9	N/A	PUBLIC	Stewardship: Overall stewardship strategy	2

How are your organisation's stewardship activities linked to your investment decision making, and vice versa?

Our measures for "Active Ownership" are an integral part of our investment process. An essential aspect of this integration is the inclusion of sustainability-related investment decisions in dedicated ESG panels. Sustainability aspects are thoroughly deliberated in these ESG panel meetings, which convene at least once a month. To ensure comprehensive consideration of sustainability, employees from all relevant divisions are members of these panels.

In the AM Liquide business area, the ESG panel for liquid assets plays a central role. It meticulously analyzes current ESG-related developments concerning individual companies, industries, and countries. Based on this analysis, the committee formulates recommendations aligned with Helaba Invest's ESG Investment Policy and Helaba Group's Sustainable Investment Framework. Regular meetings are held at least monthly, with additional ad hoc meetings as needed.

Similarly, in the AM Illiquide business area, the ESG panel for illiquid assets plays a pivotal role. It focuses on decision-making processes at the target fund level, such as property transactions and asset management activities, as well as at the product level, encompassing new product development and product optimization. The panel actively formulates specific recommendations for the investment committee. To ensure effective coordination, the panel meets at least once a month and convenes ad hoc meetings as required. In the reporting year 2023, ESG topics were discussed in investment board meetings of the AM Illiquid business area.

For your listed equity holdings, what escalation measures did your organisation, or the external investment managers or service providers acting on your behalf, use in the past three years?

(1) Listed equity

(A) Joining or broadening an existing collaborative engagement or creating a new one

(B) Filing, co-filing, and/or submitting a shareholder resolution or proposal

(C) Publicly engaging the entity, e.g. signing an open letter

(D) Voting against the re-election of one or more board directors

(E) Voting against the chair of the board of directors, or equivalent, e.g. lead independent director

(F) Divesting

(G) Litigation

(H) Other

(I) In the past three years, we did not use any of the above escalation measures for our listed equity holdings

Indicator	Type of indicator	Dependent on	Gateway to	Disclosure	Subsection	PRI Principle
PGS 37	CORE	Multiple, see guidance	N/A	PUBLIC	Stewardship: Escalation	2

For your corporate fixed income assets, what escalation measures did your organisation, or the external investment managers or service providers acting on your behalf, use in the past three years?

- (A) Joining or broadening an existing collaborative engagement or creating a new one
- (B) Publicly engaging the entity, e.g. signing an open letter
- (C) Not investing
- (D) Reducing exposure to the investee entity
- (E) Divesting
- (F) Litigation
- (G) Other
- (H) In the past three years, we did not use any of the above escalation measures for our corporate fixed income assets

STEWARDSHIP: ENGAGEMENT WITH POLICY MAKERS

Indicator	Type of indicator	Dependent on	Gateway to	Disclosure	Subsection	PRI Principle
PGS 39	CORE	OO 8, OO 9	PGS 39.1, PGS 39.2	PUBLIC	Stewardship: Engagement with policy makers	2

Did your organisation, or the external investment managers or service providers acting on your behalf, engage with policy makers as part of your responsible investment approach during the reporting year?

- (A) Yes, we engaged with policy makers directly
- (B) Yes, we engaged with policy makers through the leadership of or active participation in working groups or collaborative initiatives, including via the PRI
- (C) Yes, we were members of, supported, or were in another way affiliated with third party organisations, including trade associations and non-profit organisations, that engage with policy makers, excluding the PRI
- (D) We did not engage with policy makers directly or indirectly during the reporting year beyond our membership in the PRI

Indicator	Type of indicator	Dependent on	Gateway to	Disclosure	Subsection	PRI Principle
PGS 39.1	CORE	PGS 39	N/A	PUBLIC	Stewardship: Engagement with policy makers	2

During the reporting year, what methods did you, or the external investment managers or service providers acting on your behalf, use to engage with policy makers as part of your responsible investment approach?

- (A) We participated in 'sign-on' letters
 - (B) We responded to policy consultations
 - (C) We provided technical input via government- or regulator-backed working groups
- Describe:

Helaba Invest is, among other associations (see indicator PGS 11.2), a member of the Bundesverband Investment und Asset Management, a significant German fund association representing the interests of the German fund industry to policymakers, regulatory authorities, and international institutions. The BVI actively engages with its members to advocate for clear criteria and standards in investments that can be recognized as sustainable according to EU regulations at both national and international political forums. We provide technical input indirectly via the association.

(D) We engaged policy makers on our own initiative

(E) **Other methods**

Describe:

Our parent company Helaba Landesbank Hesse-Thuringia engages with policy makers through associations and initiatives. For further details see Helaba Group's sustainability report 2023, available under <https://www.helaba.com/media/docs/int/sustainability/sustainability-report-2023.pdf> (pp. 24, 52).

(C) No, we did not publicly disclose details of our engagement with policy makers conducted as part of our responsible investment approach during the reporting year

STEWARDSHIP: EXAMPLES

Indicator	Type of indicator	Dependent on	Gateway to	Disclosure	Subsection	PRI Principle
PGS 40	PLUS	OO 8, OO 9	N/A	PUBLIC	Stewardship: Examples	2

Provide examples of stewardship activities that you conducted individually or collaboratively during the reporting year that contributed to desired changes in the investees, policy makers or other entities with which you interacted.

(A) Example 1:

Title of stewardship activity:

Publishing ISS voting results publicly

(1) Led by

(1) Internally led

(2) **External service provider led**

(3) Led by an external investment manager, real assets third-party operator and/or external property manager

(2) Primary focus of stewardship activity

(1) **Environmental factors**

(2) **Social factors**

(3) **Governance factors**

(3) Asset class(es)

- (1) **Listed equity**
- (2) Fixed income
- (3) Private equity
- (4) Real estate
- (5) Infrastructure
- (6) Hedge funds
- (7) Forestry
- (8) Farmland
- (9) Other

(4) Description of the activity and what was achieved. For collaborative activities, provide detail on your individual contribution.

We regularly publish the voting results on our homepage:

<https://www.helaba-invest.de/wir-ueber-uns/corporate-governance/>

(B) Example 2:

Title of stewardship activity:

Internal engagement for liquid assets

(1) Led by

- (1) **Internally led**
- (2) External service provider led
- (3) Led by an external investment manager, real assets third-party operator and/or external property manager

(2) Primary focus of stewardship activity

- (1) **Environmental factors**
- (2) Social factors
- (3) Governance factors

(3) Asset class(es)

- (1) **Listed equity**
- (2) **Fixed income**
- (3) Private equity
- (4) Real estate
- (5) Infrastructure
- (6) Hedge funds
- (7) Forestry
- (8) Farmland
- (9) Other

(4) Description of the activity and what was achieved. For collaborative activities, provide detail on your individual contribution.

In the reporting year, our internally led engagement team reached out for an engagement with a fossil fuel station operator which aimed at a holistic consideration of carbon emission reduction plans for 2030. Although the company's investor relations team had not responded to the outreach, the company did publish a climate strategy which exceeded the requested scope extension of its carbon emissions,

(C) Example 3:

Title of stewardship activity:

External collaborative engagement via the ISS Norm-Based Engagement service

(1) Led by

- (1) Internally led
- (2) **External service provider led**
- (3) Led by an external investment manager, real assets third-party operator and/or external property manager

(2) Primary focus of stewardship activity

- (1) **Environmental factors**
- (2) **Social factors**
- (3) **Governance factors**

(3) Asset class(es)

- (1) **Listed equity**
- (2) **Fixed income**
- (3) Private equity

- (4) Real estate
- (5) Infrastructure
- (6) Hedge funds
- (7) Forestry
- (8) Farmland
- (9) Other

(4) Description of the activity and what was achieved. For collaborative activities, provide detail on your individual contribution.

We regularly publish the engagement results on our homepage: <https://www.helaba-invest.de/wir-ueber-uns/corporate-governance/>

(D) Example 4:

Title of stewardship activity:

(1) Led by

- (1) Internally led
- (2) External service provider led
- (3) Led by an external investment manager, real assets third-party operator and/or external property manager

(2) Primary focus of stewardship activity

- (1) Environmental factors
- (2) Social factors
- (3) Governance factors

(3) Asset class(es)

- (1) Listed equity
- (2) Fixed income
- (3) Private equity
- (4) Real estate
- (5) Infrastructure
- (6) Hedge funds
- (7) Forestry
- (8) Farmland
- (9) Other

(4) Description of the activity and what was achieved. For collaborative activities, provide detail on your individual contribution.

(E) Example 5:

Title of stewardship activity:

(1) Led by

- (1) Internally led
- (2) External service provider led
- (3) Led by an external investment manager, real assets third-party operator and/or external property manager

(2) Primary focus of stewardship activity

- (1) Environmental factors
- (2) Social factors
- (3) Governance factors

(3) Asset class(es)

- (1) Listed equity
- (2) Fixed income
- (3) Private equity
- (4) Real estate
- (5) Infrastructure
- (6) Hedge funds
- (7) Forestry
- (8) Farmland
- (9) Other

(4) Description of the activity and what was achieved. For collaborative activities, provide detail on your individual contribution.

CLIMATE CHANGE

Indicator	Type of indicator	Dependent on	Gateway to	Disclosure	Subsection	PRI Principle
PGS 41	CORE	N/A	PGS 41.1	PUBLIC	Climate change	General

Has your organisation identified climate-related risks and opportunities affecting your investments?

- (A) Yes, within our standard planning horizon
- (B) Yes, beyond our standard planning horizon**
- Specify the risks and opportunities identified and your relevant standard planning horizon:

Through our actions, we aim to actively contribute to the achievement of climate goals and reduce climate risks. By climate risks, we primarily refer to transition risks, which are the risks arising from changes in the valuation of capital investments during the transition to a low-carbon economy. In order to accomplish our objectives, we refrain from investing in companies whose business model is heavily reliant on coal-fired power generation. To implement this, we use a turnover threshold of 25%. Furthermore, we exclude companies engaged in activities such as oil and tar sands mining, fracking and arctic drilling, which generate a turnover share of more than 5% from these sectors. Additionally, we strive to achieve a sustainable CO2 intensity for our portfolios. Additional climate-related risks are taken into consideration in preparation of the Sustainable Investment Framework of the Helaba Group (see indicator SLS 1).

- (C) No, we have not identified climate-related risks and/or opportunities affecting our investments

Indicator	Type of indicator	Dependent on	Gateway to	Disclosure	Subsection	PRI Principle
PGS 41.1	CORE	PGS 41	N/A	PUBLIC	Climate change	General

Does your organisation integrate climate-related risks and opportunities affecting your investments in its overall investment strategy, financial planning and (if relevant) products?

- (A) Yes, our overall investment strategy, financial planning and (if relevant) products integrate climate-related risks and opportunities**

Describe how climate-related risks and opportunities have affected or are expected to affect your investment strategy, financial planning and (if relevant) products:

Sustainability risks are an integral part of Helaba Invest's comprehensive risk management approach. In accordance with the BaFin guidelines on managing sustainability risks, sustainability risks are not treated as a separate risk category but rather as drivers of existing risk categories. The risk manager at Helaba Invest is responsible for risks to which the company is directly exposed. The Risk Controlling group operates as an independent control unit for Helaba Invest's investment funds, separate from the fund management team.

Within the operational ESG risk management framework, the ESG- panel for liquid assets, in collaboration with sector and country specialists, assesses companies, and countries of concern. Based on the ESG- panel's recommendations, the investment committee makes the final decision. The identified issuers undergo regular reviews, and additional analyses are conducted as needed. The results of these assessments are transparently available internally.

In the selection process for target fund products in illiquid assets, ESG risk management is an integral part of the due diligence process. Sustainability risks are also taken into account when acquiring new assets. In the management of existing investments, target fund managers are regularly encouraged during committee meetings to enhance transparency regarding ESG factors and ESG performance. Furthermore, we expect that governments will advance in climate-related legislation which will effect portfolio companies. Therefore, we expect to see a change in risk and return assessments of various assets especially in liquid assets. In light of the European Green Deal, we expect a rise in costs associated with regulatory compliance which may reduce the availability of resources in our investment related departments.

- (B) No, our organisation has not yet integrated climate-related risks and opportunities into its investment strategy, financial planning and (if relevant) products

Indicator	Type of indicator	Dependent on	Gateway to	Disclosure	Subsection	PRI Principle
PGS 42	PLUS	N/A	N/A	PUBLIC	Climate change	General

Which sectors are covered by your organisation’s strategy addressing high-emitting sectors?

(A) Coal

Describe your strategy:

When analyzing creditworthiness and sustainability, we take into account, among other things, the CO2 intensity of the issuers and, as far as possible within the scope of the mandate, give preference to those with better values or transition values as well as companies that have technologies to reduce greenhouse gas emissions. In addition, we refrain from investing in companies whose business model is heavily reliant on coal mining and coal-fired power generation. To implement this, we use a turnover threshold of 25%. Under our Sustainable Investment Framework, the limit for funds managed in accordance with Article 8 SFDR is limited to a maximum of 10% of turnover.

(B) Gas

Describe your strategy:

When analyzing creditworthiness and sustainability, we take into account, among other things, the CO2 intensity of the issuers and, as far as possible within the scope of the mandate, give preference to those with better values or transition values as well as companies that have technologies to reduce greenhouse gas emissions. In addition, we exclude companies engaged in activities such as fracking and arctic drilling, which generate a turnover share of more than 5% from these sectors.

(C) Oil

Describe your strategy:

When analyzing creditworthiness and sustainability, we take into account, among other things, the CO2 intensity of the issuers and, as far as possible within the scope of the mandate, give preference to those with better values or transition values as well as companies that have technologies to reduce greenhouse gas emissions. In addition, we exclude companies engaged in activities such as oil and tar sands mining, fracking, and arctic drilling, which generate a turnover share of more than 5% from these sectors.

(D) Utilities

Describe your strategy:

When analyzing creditworthiness and sustainability, we take into account, among other things, the CO2 intensity of the issuers and, as far as possible within the scope of the mandate, give preference to those with better values or transition values as well as companies that have technologies to reduce greenhouse gas emissions.

(E) Cement

Describe your strategy:

When analyzing creditworthiness and sustainability, we take into account, among other things, the CO2 intensity of the issuers and, as far as possible within the scope of the mandate, give preference to those with better values or transition values as well as companies that have technologies to reduce greenhouse gas emissions.

(F) Steel

Describe your strategy:

When analyzing creditworthiness and sustainability, we take into account, among other things, the CO2 intensity of the issuers and, as far as possible within the scope of the mandate, give preference to those with better values or transition values as well as companies that have technologies to reduce greenhouse gas emissions.

(G) Aviation

Describe your strategy:

When analyzing creditworthiness and sustainability, we take into account, among other things, the CO2 intensity of the issuers and, as far as possible within the scope of the mandate, give preference to those with better values or transition values as well as companies that have technologies to reduce greenhouse gas emissions.

(H) Heavy duty road

Describe your strategy:

When analyzing creditworthiness and sustainability, we take into account, among other things, the CO2 intensity of the issuers and, as far as possible within the scope of the mandate, give preference to those with better values or transition values as well as companies that have technologies to reduce greenhouse gas emissions.

(I) Light duty road

Describe your strategy:

When analyzing creditworthiness and sustainability, we take into account, among other things, the CO2 intensity of the issuers and, as far as possible within the scope of the mandate, give preference to those with better values or transition values as well as companies that have technologies to reduce greenhouse gas emissions.

(J) Shipping

Describe your strategy:

When analyzing creditworthiness and sustainability, we take into account, among other things, the CO2 intensity of the issuers and, as far as possible within the scope of the mandate, give preference to those with better values or transition values as well as companies that have technologies to reduce greenhouse gas emissions.

(K) Aluminium

Describe your strategy:

When analyzing creditworthiness and sustainability, we take into account, among other things, the CO2 intensity of the issuers and, as far as possible within the scope of the mandate, give preference to those with better values or transition values as well as companies that have technologies to reduce greenhouse gas emissions.

(L) Agriculture, forestry, fishery

Describe your strategy:

When analyzing creditworthiness and sustainability, we take into account, among other things, the CO2 intensity of the issuers and, as far as possible within the scope of the mandate, give preference to those with better values or transition values as well as companies that have technologies to reduce greenhouse gas emissions.

(M) Chemicals

Describe your strategy:

When analyzing creditworthiness and sustainability, we take into account, among other things, the CO2 intensity of the issuers and, as far as possible within the scope of the mandate, give preference to those with better values or transition values as well as companies that have technologies to reduce greenhouse gas emissions.

(N) Construction and buildings

Describe your strategy:

When analyzing creditworthiness and sustainability, we take into account, among other things, the CO2 intensity of the issuers and, as far as possible within the scope of the mandate, give preference to those with better values or transition values as well as companies that have technologies to reduce greenhouse gas emissions.

(O) Textile and leather

Describe your strategy:

When analyzing creditworthiness and sustainability, we take into account, among other things, the CO2 intensity of the issuers and, as far as possible within the scope of the mandate, give preference to those with better values or transition values as well as companies that have technologies to reduce greenhouse gas emissions.

(P) Water

Describe your strategy:

When analyzing creditworthiness and sustainability, we take into account, among other things, the CO2 intensity of the issuers and, as far as possible within the scope of the mandate, give preference to those with better values or transition values as well as companies that have technologies to reduce greenhouse gas emissions.

(Q) Other

Specify:

Reduction of the Weighted Average Carbon Intensity of funds.

Describe your strategy:

Additionally, we strive to achieve a sustainable CO2 intensity (Weighted Average Carbon Intensity) for our portfolios.

- o (R) We do not have a strategy addressing high-emitting sectors

Indicator	Type of indicator	Dependent on	Gateway to	Disclosure	Subsection	PRI Principle
PGS 43	CORE	N/A	N/A	PUBLIC	Climate change	General

Has your organisation assessed the resilience of its investment strategy in different climate scenarios, including one in which the average temperature rise is held to below 2 degrees Celsius (preferably to 1.5 degrees Celsius) above pre-industrial levels?

- (A) Yes, using the Inevitable Policy Response Forecast Policy Scenario (FPS) or Required Policy Scenario (RPS)
- (B) Yes, using the One Earth Climate Model scenario
- (C) Yes, using the International Energy Agency (IEA) Net Zero scenario
- (D) Yes, using other scenarios
- (E) No, we have not assessed the resilience of our investment strategy in different climate scenarios, including one that holds temperature rise to below 2 degrees**

Indicator	Type of indicator	Dependent on	Gateway to	Disclosure	Subsection	PRI Principle
PGS 44	CORE	N/A	N/A	PUBLIC	Climate change	General

Does your organisation have a process to identify, assess, and manage the climate-related risks (potentially) affecting your investments?

(A) Yes, we have a process to identify and assess climate-related risks

(1) Describe your process

Within the operational ESG risk management framework, the ESG- panel for liquid assets, in collaboration with sector and country specialists, assesses companies of concern also with respect to climate risks. Based on the committee's recommendations, the investment committee makes the final investment recommendation. The identified issuers undergo regular reviews, and additional analyses are conducted as needed. The results of these assessments are transparently available internally. In December 2023, Helaba Group published internally its Sustainable Investment Framework. The framework discloses, among others, the climate strategy of investee companies as a focal issue of Helaba Invest's engagement.

(2) Describe how this process is integrated into your overall risk management

If the ESG- panel for liquid assets votes for investment restrictions because of climate-related risks, the Risk Controlling Group includes these issuer restrictions in the firm-wide controlling systems and ensures continuous pre-trade and post-trade compliance checks.

(B) Yes, we have a process to manage climate-related risks

(1) Describe your process

Through our actions, we aim to make an active contribution to achieving climate targets and reducing climate risks for the portfolio. By climate risks, we primarily mean transition risks, i.e. risks arising from changes in the valuation of investments during the transition to a low-carbon economy.

To achieve our goals, we refrain from investing in companies whose business model is heavily geared to coal mining and coal-fired power generation. We use a 25% turnover limit (10% under Sustainable Investment Framework) to operationalize this. Furthermore, we exclude companies that engage in oil and tar sands mining, fracking and arctic drilling and thereby generate a share of sales greater than 5% from these areas. In addition, we work towards a sustainable CO2 intensity in our portfolios. Some strategies are even more ambitious with respect to coal exposures and target significant improvements in the carbon footprint compared to their reference index. The latter concepts also overweight climate-friendly companies to support winners of the transition process.

(2) Describe how this process is integrated into your overall risk management

Sustainability risks are an integral part of Helaba Invest's comprehensive risk management approach. In accordance with the BaFin guidelines on managing sustainability risks, sustainability risks are not treated as a separate risk category but rather as drivers of existing risk categories. The Risk Controlling group operates as an independent control unit for Helaba Invest's investment funds and is in charge of the automated controlling systems enabling a continuous pre-trade and post-trade compliance check with respect to sustainability-related risks including the mentioned climate criteria.

- (C) No, we do not have any processes to identify, assess, or manage the climate-related risks affecting our investments

- (J) Other metrics or variables**
 - Specify:

With comprehensive ESG reporting for liquid assets, Helaba Invest supports its investors in achieving sustainable reporting and reveals the ESG performance of a portfolio. The ESG reporting relies on extensive data from MSCI ESG Research, one of the world's largest providers of sustainability analysis and ratings in the ESG domains. The following ESG standard report is available to all licensed fund units:

- The "ESG Carbon" report allows analyzing fund units based on their CO2 intensity. Besides a fund-level metric, the report provides detailed sector data and identifies issuers with high and low CO2 intensity.

Our remaining ESG reports contain climate change-related metrics or variables indirectly:

- The "ESG Score" and "ESG Rating" reports enable investors to analyze their investments concerning environmental, social, and governance aspects. The reports provide detailed sector analyses, excerpts of ESG information at the issuer level, and aggregations at the fund level.

- The "ESG Controversies" report addresses violations of national and international laws, regulations, and generally accepted norms, principles, and conventions. It is a crucial element of sustainability reporting.

- The "Business Involvement Screening Research (BISR)" report focuses on analyzing the business areas in which companies operate. It offers an overview of involvement in selected controversial business sectors and provides information on individual issuers.

- (B) No, we have not yet taken action on any specific sustainability outcomes connected to our investment activities

Indicator	Type of indicator	Dependent on	Gateway to	Disclosure	Subsection	PRI Principle
PGS 48.1	PLUS	PGS 48	N/A	PUBLIC	Sustainability outcomes	1, 2

Why has your organisation taken action on specific sustainability outcomes connected to its investment activities?

- (A) We believe that taking action on sustainability outcomes is relevant to our financial risks and returns over both short- and long-term horizons**
- (B) We believe that taking action on sustainability outcomes, although not yet relevant to our financial risks and returns, will become so over a long-time horizon
- (C) We have been requested to do so by our clients and/or beneficiaries**
- (D) We want to prepare for and respond to legal and regulatory developments that are increasingly addressing sustainability outcomes**
- (E) We want to protect our reputation, particularly in the event of negative sustainability outcomes connected to investments**

- (F) We want to enhance our social licence-to-operate (i.e. the trust of beneficiaries, clients, and other stakeholders)
- (G) We believe that taking action on sustainability outcomes in parallel to financial return goals has merit in its own right
- (H) Other

HUMAN RIGHTS

Indicator	Type of indicator	Dependent on	Gateway to	Disclosure	Subsection	PRI Principle
PGS 49	PLUS	PGS 47	PGS 49.1	PUBLIC	Human rights	1, 2

During the reporting year, what steps did your organisation take to identify and take action on the actual and potentially negative outcomes for people connected to your investment activities?

- (A) We assessed the human rights context of our potential and/or existing investments and projected how this could connect our organisation to negative human rights outcomes
- (B) We assessed whether individuals at risk or already affected might be at heightened risk of harm
- (C) We consulted with individuals and groups who were at risk or already affected, their representatives and/or other relevant stakeholders such as human rights experts
- (D) We took other steps to assess and manage the actual and potentially negative outcomes for people connected to our investment activities**

Specify:

We refrain from investing in derivatives whose underlying assets are food commodities. Furthermore, we exclude direct investments in companies involved in controversial business practices. We define such practices as the production of controversial weapons, including cluster munitions, landmines, biological and chemical weapons, as well as nuclear weapons.

For funds that promote environmental or social characteristics or implement a sustainability-oriented investment strategy in accordance with the EU Sustainable Finance Disclosure Regulation, we do not invest in companies that violate the principles of the UN Global Compact (UNGC). In addition to that, in certain instances, the Freedom House Index is utilized as an assessment criterion.

Explain how these activities were conducted:

In relation to all assets under our management, our ESG investment policy is consistently applied, encompassing the exclusion of derivatives based on food commodities and controversial weapons. In 2023, we contributed to the group-wide Sustainable Investment Framework, which will be mandatory for publicly-offered investment funds for our institutional clients, which are managed by us and are launched after April 2024. The first quarter of 2024 will function as the implementation period for the criteria of the new framework. In the framework, the consideration of human rights takes place on the one hand in the engagement process and on the other hand via UN Global Compact-related checks in the above-mentioned funds as part of the sustainability-related exclusion criteria for compliance with the do no significant harm criterion laid to in the Sustainable Finance Disclosure Regulation. For all funds which disclose under Article 8 of the Sustainable Finance Disclosure Regulation, we have established internal procedures and guidelines that are able to mandate an examination of the UN Global Compact and advocate for the utilization of the Freedom House Index. In some funds, we applied ESG-related exclusion criteria to ensure compliance with product requirements which are adequate for clients with sustainability preferences in accordance with MiFID II.

- (E) We did not identify and take action on the actual and potentially negative outcomes for people connected to any of our investment activities during the reporting year

Indicator	Type of indicator	Dependent on	Gateway to	Disclosure	Subsection	PRI Principle
PGS 49.2	PLUS	PGS 47	N/A	PUBLIC	Human rights	1, 2

During the reporting year, what information sources did your organisation use to identify the actual and potentially negative outcomes for people connected to its investment activities?

- (A) Corporate disclosures
- (B) Media reports
- (C) Reports and other information from NGOs and human rights institutions
- (D) Country reports, for example, by multilateral institutions, e.g. OECD, World Bank
- (E) Data provider scores or benchmarks
- (F) Human rights violation alerts
- (G) Sell-side research
- (H) Investor networks or other investors
- (I) Information provided directly by affected stakeholders or their representatives
- (J) Social media analysis

(K) Other

Specify:

- MSCI
- GRESB

Provide further detail on how your organisation used these information sources:

MSCI: Our analysis of liquid assets relies on data provided by MSCI ESG, which is derived from a diverse range of sources, including public disclosures, sustainability reports, and third-party data like Freedom House. MSCI employs a proprietary and rule-based methodology to assign scores to companies based on their ESG performance. These scores, in turn, determine the ESG ratings, offering investors a comprehensive insight into a company's ESG profile, including the associated risks and opportunities arising from its business practices and potentially negative outcomes for people.

GRESB: Additionally, for the majority of our real estate target funds, we collaborate with GRESB. The GRESB Assessments meticulously capture critical ESG data related to the sustainability performance of real estate and infrastructure companies and assets aggregated onto fund level. Within GRESB's framework, we emphasize ESG assessments and benchmarks exclusively for two asset classes: real estate and infrastructure. Each of these assessments addresses material issues that are deemed significant for evaluating the sustainability performance of investments, as recognized and valued by investors and the industry.

Indicator	Type of indicator	Dependent on	Gateway to	Disclosure	Subsection	PRI Principle

MANAGER SELECTION, APPOINTMENT AND MONITORING (SAM)

OVERALL APPROACH

EXTERNAL INVESTMENT MANAGERS

Indicator	Type of indicator	Dependent on	Gateway to	Disclosure	Subsection	PRI Principle
SAM 1	CORE	OO 21	N/A	PUBLIC	External investment managers	4

For the majority of your externally managed AUM in each asset class, which responsible investment aspects does your organisation consider important in the assessment of external investment managers?

(6) Real estate

Organisation

(A) Commitment to and experience in responsible investment

(B) Responsible investment policy(ies)

(C) Governance structure and senior-level oversight and accountability

People and Culture

(D) Adequate resourcing and incentives

(E) Staff competencies and experience in responsible investment

Investment Process

(F) Incorporation of material ESG factors in the investment process

(G) Incorporation of risks connected to systematic sustainability issues in the investment process

(H) Incorporation of material ESG factors and ESG risks connected to systematic sustainability issues in portfolio risk assessment

Stewardship

(I) Policy(ies) or guidelines on stewardship

(J) Policy(ies) or guidelines on (proxy) voting

(K) Use of stewardship tools and activities

(L) Incorporation of risks connected to systematic sustainability issues in stewardship practices

(M) Involvement in collaborative engagement and stewardship initiatives

(N) Engagement with policy makers and other non-investee stakeholders

(O) Results of stewardship activities

Performance and Reporting

(P) ESG disclosure in regular client reporting

(Q) Inclusion of ESG factors in contractual agreements

(R) We do not consider any of the above responsible investment aspects important in the assessment of external investment managers

SERVICE PROVIDERS

Indicator	Type of indicator	Dependent on	Gateway to	Disclosure	Subsection	PRI Principle
SAM 2	CORE	OO 21	N/A	PUBLIC	Service providers	4

Which responsible investment aspects does your organisation consider important when assessing all service providers that advise you in the selection, appointment and/or monitoring of external investment managers?

- (A) Incorporation of their responsible investment policy into advisory services
- (B) Ability to accommodate our responsible investment policy
- (C) Level of staff's responsible investment expertise
- (D) Use of data and analytical tools to assess the external investment manager's responsible investment performance
- (E) Other
- (F) We do not consider any of the above responsible investment aspects important when assessing service providers that advise us in the selection, appointment and/or monitoring of external investment managers
- (G) Not applicable; we do not engage service providers in the selection, appointment or monitoring of external investment managers

POOLED FUNDS

Indicator	Type of indicator	Dependent on	Gateway to	Disclosure	Subsection	PRI Principle
SAM 3	PLUS	OO 5.2, OO 21	N/A	PUBLIC	Pooled funds	4

If you invest in pooled funds, describe how you incorporate responsible investment aspects into the selection, appointment and/or monitoring of external investment managers.

Provide example(s) below

(A) Selection
Our investments undergo an ESG due diligence as part of the investment process. The underpinning of this approach lies in an internal process for data collection, analysis, and assessment from an Environmental, Social, and Governance (ESG) perspective. Topics such as transparency requirements of the Sustainable Finance Disclosure Regulation, independent certifications (e.g., GRESB), exclusion criteria, principal adverse impacts on sustainability indicators, and the general inclusion of environmental, social, and governance aspects can be addressed.

(B) Appointment
When investing into pooled real estate funds, the appointment of external investment managers is based partly on real estate-related ESG considerations, as well as the relevant requirements in accordance with the investment strategy.

(C) Monitoring
In the management of existing investments, target fund managers are regularly encouraged during committee meetings to enhance transparency regarding ESG factors and ESG performance. In case of an infrastructure fund of funds which discloses under Article 8 SFDR we defined clear KPIs which has to be recorded systematically.

LE 5	PLUS	OO 21	N/A	PUBLIC	ESG incorporation in portfolio construction	1

Provide an example of how you incorporated ESG factors into your equity selection and research process during the reporting year.

We exclude manufacturers of controversial weapons in the securities funds we manage. For us, this includes cluster bombs, land mines, biological and chemical weapons, and nuclear weapons. Furthermore, we do not include derivatives in the securities funds we manage, whose underlying assets are foodstuffs.

Through our actions, we aim to make an active contribution to achieving climate targets and reducing climate risks for the portfolio. We thus refrain from investing in companies whose business model is heavily reliant on coal-fired power generation. To implement this, we use a turnover threshold of 25%. Moreover, we exclude companies engaged in activities such as oil and tar sands mining, fracking and arctic drilling, which generate a turnover share of more than 5% from these sectors. Additionally, we strive to achieve a sustainable CO2 intensity for our portfolios. Some strategies are even more ambitious with respect to coal exposures and target significant improvements in the carbon footprint compared to their reference index. The latter concepts also overweight climate-friendly companies to support winners of the transition process.

Apart from that, our ESG-panel for liquid assets conducts a thorough risk assessment of very heavy ESG controversies on a quarterly basis and determines the investability of the involved issuers.
